

OKÁ

PROBLEM

WHERE? CAIRO

- ▲ The largest city in Egypt
- ▲ The largest city in Africa
- ▲ 15,000 tons of waste per day

Source: CAPMAS (2014) Central Agency for Public Mobilization and Statistics.Census Info Egypt.
Available at: <http://www.censusinfo.capmas.gov.eg/>

CAIRO
15,000 ton/day

SÃO PAULO
18,000 ton/day

HOW TO DEAL WITH GARBAGE IN A SMART CITY?

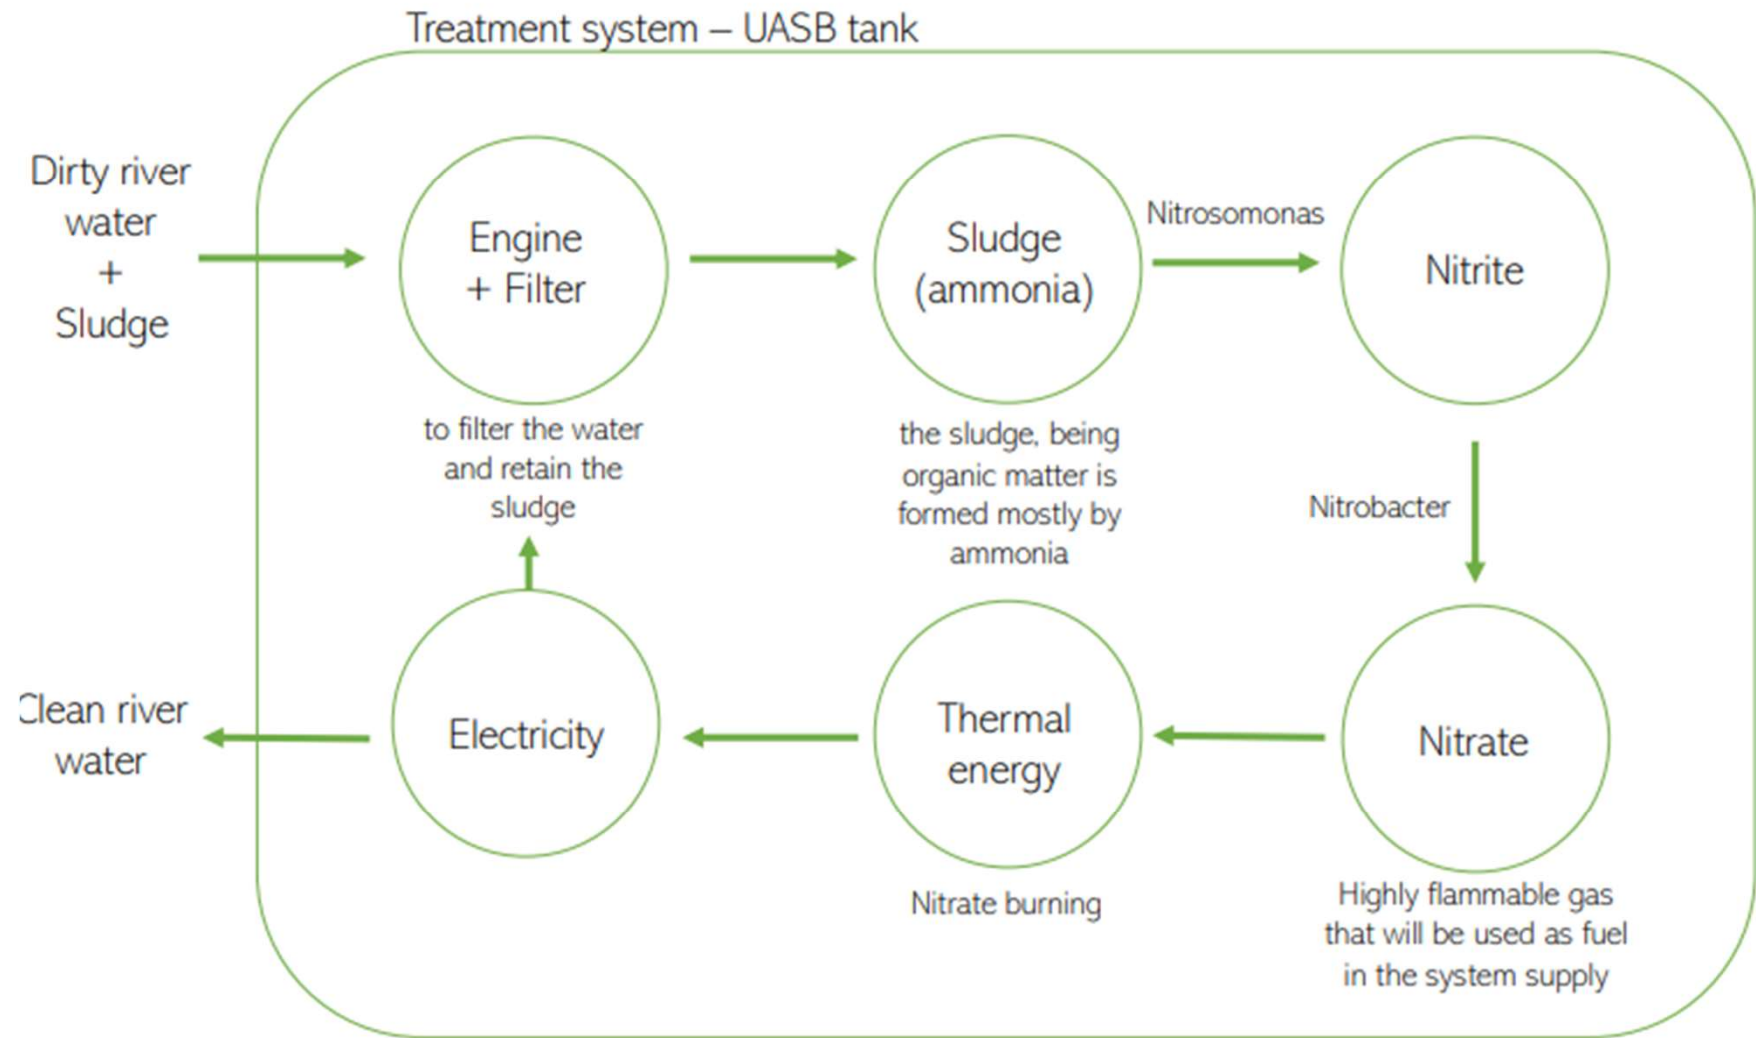

SOLUTION

- ▲ Sludge
- ▲ Nitrogen cycle
- ▲ Ammonia
- ▲ Supersaturated soil

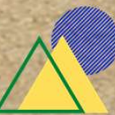

Self-sufficient sludge and water treatment cycle

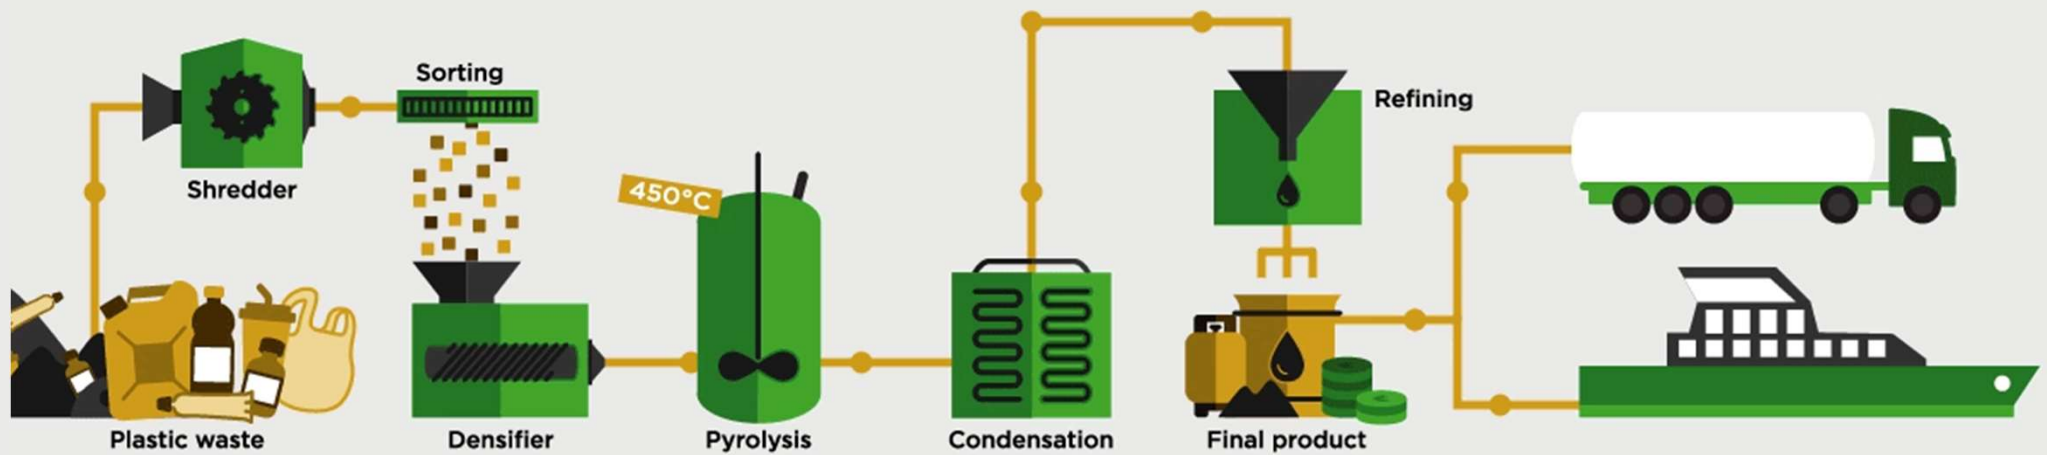

SOLUTION

- ▲ Municipal Solid Waste - MSW
- ▲ Lack of space for new landfills
- ▲ Generate electricity by **pyrolysis**

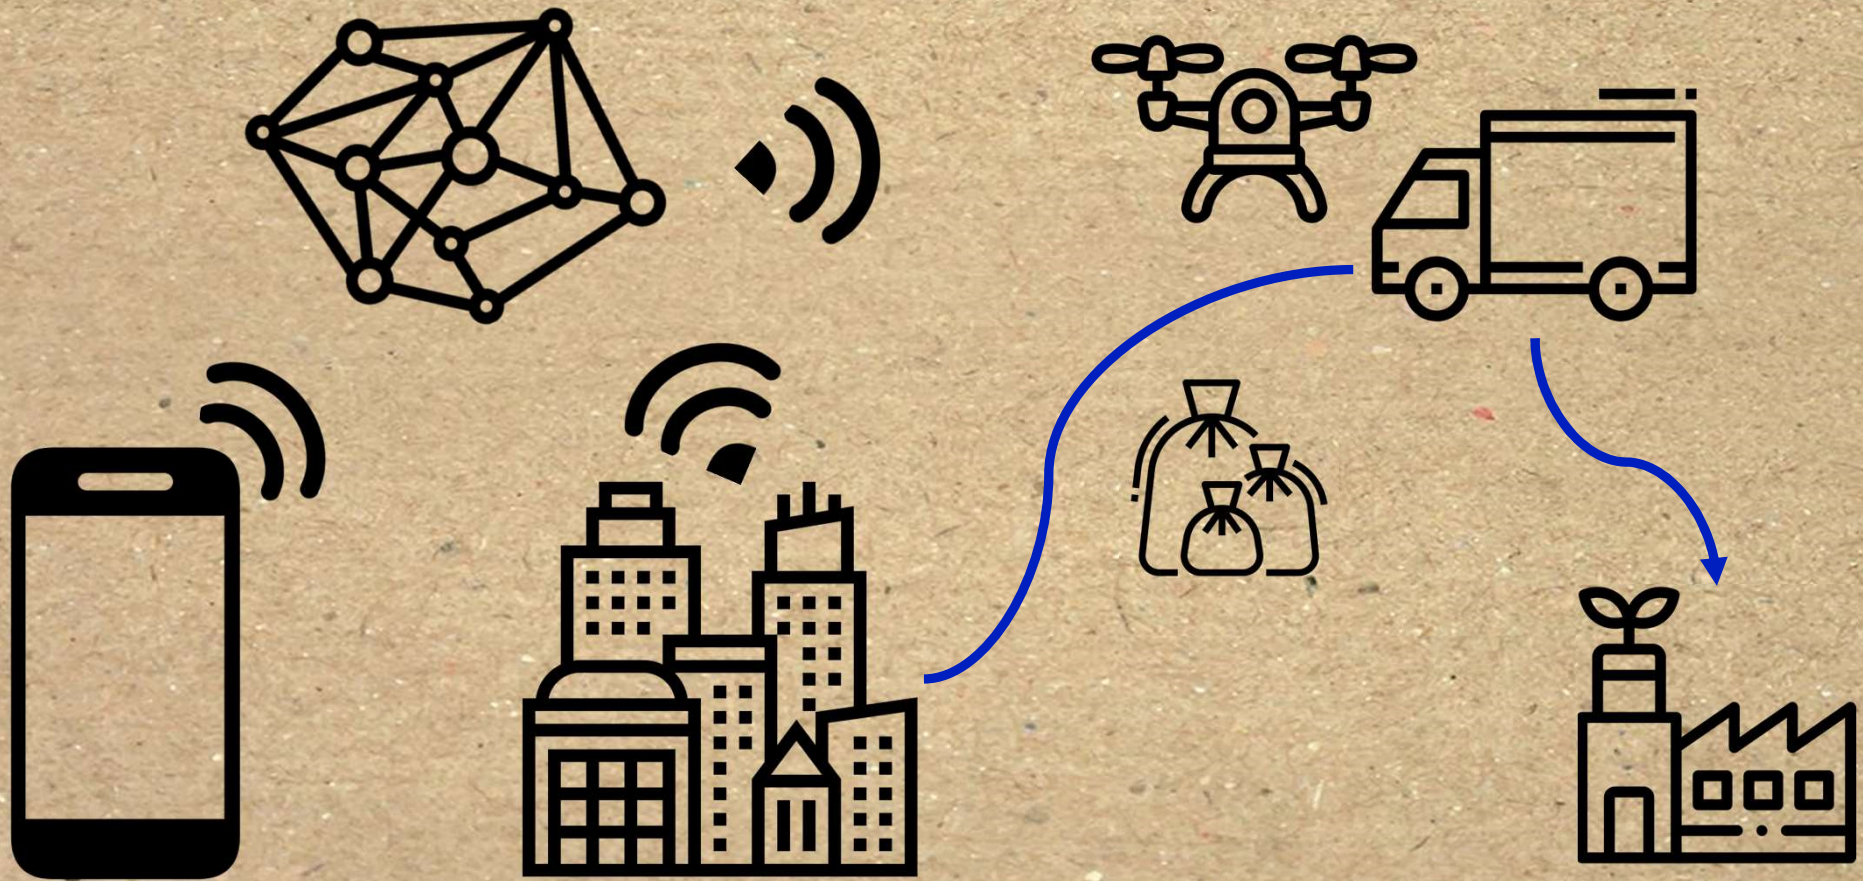

WHAT IS PYROLYSIS

Source: <http://www.makeenenergy.com/home/business-areas/plastic-waste-conversion-plastcon/the-process-in-plastcon/>

EVOLUTION POTENTIAL

SCALABILITY

587,000

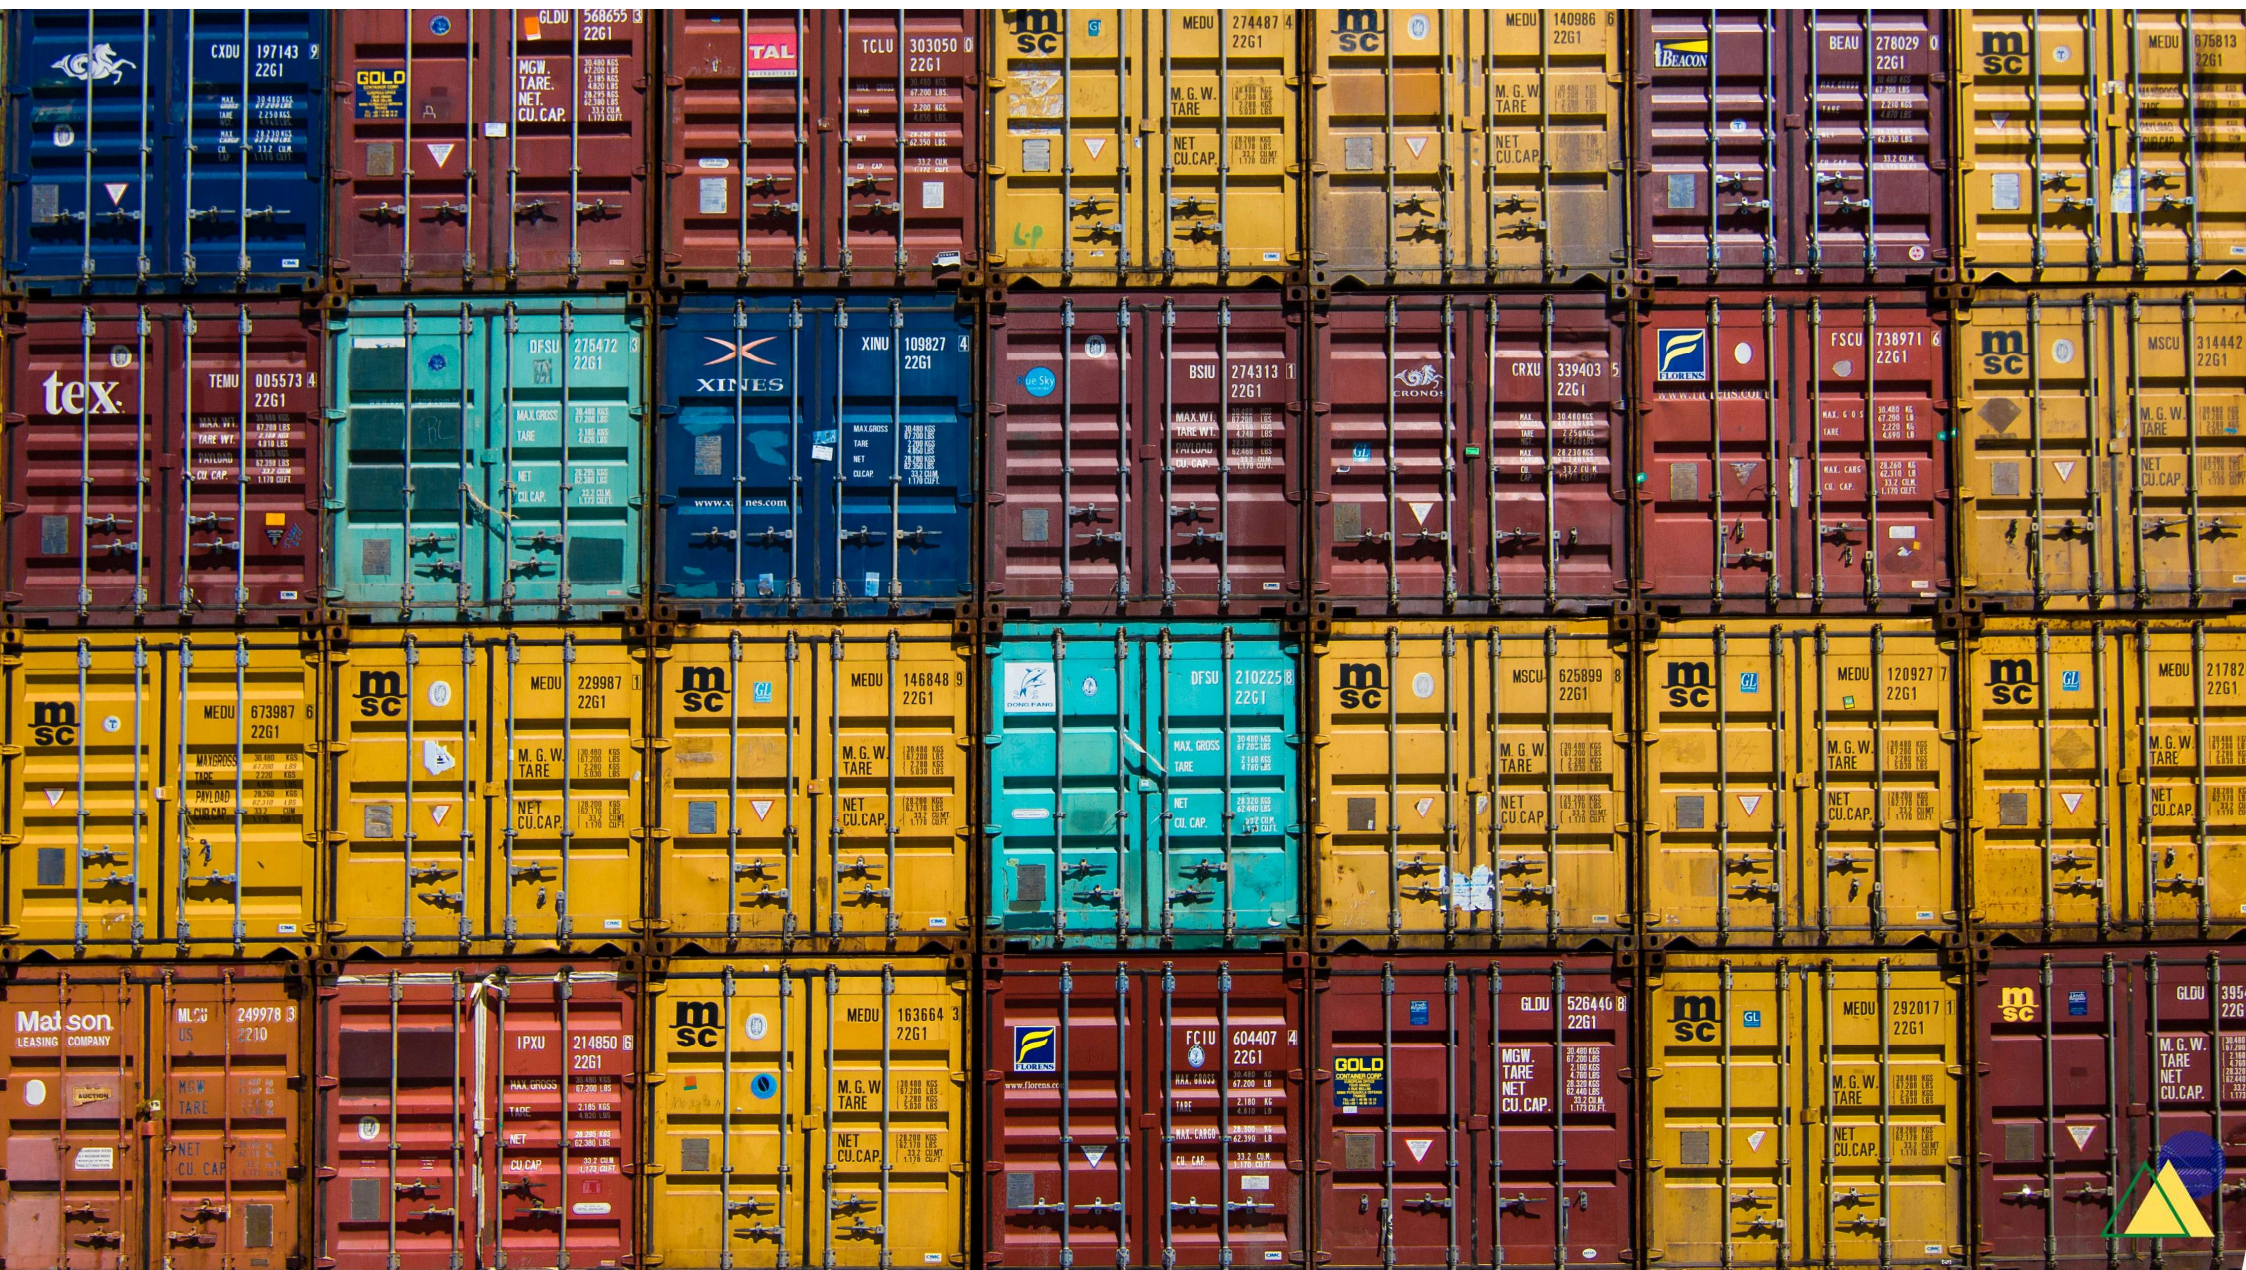

Tons of common garbage

36,000

Houses in a month

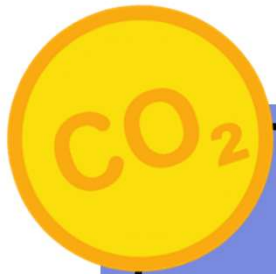

OPPORTUNITY

Reduces:

- ▲ The amount of garbage and organic matter in rivers
- ▲ Bad smell
- ▲ Possibility of flooding
- ▲ Air pollution

MARKET

Local governments

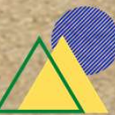

Private sector

DIFERENTIAL AND IMPACT

- ▲ Closed system
- ▲ Energy generation
- ▲ Burning of garbage in a green way
- ▲ Sustainable engagement

SUSTAINABILITY AND SDGs

3 GOOD HEALTH
AND WELL-BEING

6 CLEAN WATER
AND SANITATION

7 AFFORDABLE AND
CLEAN ENERGY

9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE

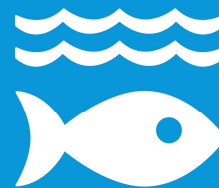

11 SUSTAINABLE CITIES
AND COMMUNITIES

13 CLIMATE
ACTION

14 LIFE
BELOW WATER

15 LIFE
ON LAND

NEXT STEPS

- ▲ Preliminary study
 - Δ Legislation
 - Δ Environment conditions
 - Δ Existing pyrolysis plants on Egypt
 - Δ River's characteristics
- ▲ Scale
- ▲ Detailed project and budget
